SUMMARY:

As a Junior Front-end Engineer, I leverage a keen eye for website aesthetics and adept problem-solving skills to create visually appealing and seamless user experiences.

TECHNICAL SKILLS:

- ReactJS
- CSS Animations
- Javascript
- WordPress
- Figma

- Tailwind CSS
- BootStrap
- Redux
- Webflow
- PhotoShop

EXPERIENCE:

UI Developer - The Dreamer Designs | Sept 2021 - July 2023

- Developed designs from PSDs and made them responsive for all screen sizes
- Fixed CSS bugs in websites made on WordPress or from scratch
- Maintained monthly AMC reports for client's websites
- Made minimal animations with CSS for websites
- Worked on multiple websites using Bootstrap
- Worked on WordPress page builders like Elementor Pro, Divi, WpBakery

WordPress Developer - Nexus Marketing Agency | Aug 2023 - Nov 2023

- Developing the website and managing the whole process
- Coordinating with Designers, Content team, and Backend team.

PROJECTS:

[Link] Blog Website

- **About:** React-based personal blog project, implementing features such as user authentication, post creation, editing, and viewing. Utilized React Router for navigation and Redux for efficient state management.
- **Tech Stack:** ReactJS, Redux, TailwindCSS, Appwrite, RealTimeTextEditor, React-hook-form

[Link] Currency Converter

- **About:** Currency Converter application using React, offering real-time currency conversion, with a list of country names to search for the currency name.
- **Tech Stack:** ReactJS, TailwindCSS, JavaScript, open API

[Link] News Search Engine

- **About:** Web app designed to fetch and display news articles based on user input. Users can search for news articles using keywords, and the app will provide a list of relevant articles along with their details.
- **Tech Stack:** ReactJS, TailwindCSS, JavaScript, open API

EDUCATION:

Oriental College of Commerce & Management, Mumbai University | Bachelor of Management Studies | June 2017 - November 2020
